

Senior/Medior Lab Automation Consultant

(ref. PIO23)

We offer you the opportunity to be part of the XiTechniX team. Our mission is to inspire, support and help scientists towards their next scientific breakthrough and operational success. In that way, we positively contribute to the improvement of the quality of life. We do this by offering software solutions and - services.

Amongst others, we are exclusive reseller for Belgium and Luxemburg of iLES

In this function your responsibilities are:

- You are expert in Lab Automation – LIMS – ELN – LES and a pivot for the team
- You successfully complete your projects as project manager.
- You implement systems according to expectations, requirements and specifications.

On a daily base you strive to deliver added value to the scientific teams of our clients.

Profile

You have a master in science with an affinity for software or you have a master in informatics/engineering with an affinity for scientific labs.

- You have at least 7 years of experience in Lab Automation – LIMS – ELN – LES.
- You have an excellent knowledge of Dutch, French and English.
- You are (co-)creator of solutions.
- You are custom-oriented and a good communicator
- You can work well both independently as in team
- You are pragmatic and down-to-earth.
- You have a quality oriented mindset.
- You are flexible
- You can think logically in processes and systems

What we offer

- A competitive salary on the payroll
- A varied and interesting job in a growing ambitious environment
- A workplace with room for initiative and responsibility
- A workplace without traffic jams in the Kempen, alternated with customer visits and working from home.
- A company where values and culture are part of the daily work.
- Personal and professional trainings.
- Appreciation for results both individual as in team
- The opportunity to contribute to the improvement of labs.
